

Sprint Review

02/12/2023 - 16/12/2023 - Sprint 4

Group ID: 5

Project Name: AuraSky - NFT Marketplace

Prepared by: Manh, Dung, Hoang, Minh

Team members:

MSSV	Description	Role
20125012	Nguyen Duc Manh	Frontend, Designer
20125025	Duong Tuan Dung	Tester, Frontend
20125031	Pham Viet Hoang	Blockchain, Backend, Project Manager
20125038	Le Nguyen Quang Minh	Blockchain, Backend, Designer

1. Goal

- Working on Software Architecture
- UI Prototype

2. What went well

- Complete the prototype UI Design for Web Seazle
- Design logical view and details components
- Develop a home screen for the Web
- Implement back-end and blockchain services
- How to connect wallet to web

3. What went wrong

- Task scheduling and time management problem
- Request data from the web to MongoDB
- Deploy smart contract to blockchain

4. What problems and what causes the problems?

- Lack of experience

5. What can be done differently in the next sprint to improve the project

- Deploy smart contract to blockchain
- Deploy back-end server
- Connect blockchain to front-end
- Write the test plan and test cases

6. What lessons we could learn

- Learn the best practices of authentication-flow
- Learn how to convert UI Design from Figma to Web
- Learn the best practices of UI/UX design with Figma
- Learn how to deploy web + server
- Learn how to optimize database processing time with blockchain transaction creation
