2. Issues and Impacts:

- a. Problems:
 - Group performance is reduced due to excessive workload.
 - The architecture of the software cannot be completed because of lack of knowledge.
- b. Temporary Solutions:
 - Need to find a more effective way to work and manage the time schedule.
 - Debates should be reached to a final conclusion, and should be avoided for the debate to escalate and affect the private relationship between members.

3. Next week's goals:

4. Summary, Performance, and Keeping track:

- Averagely, each member needs about 10 - 15 hours for a topic-learning task because the knowledge has started to become harder than in Sprint 2.
- Tasks are committed before due time, and remaining tasks are predictably sufficient for the following week.
- The sprint process is properly on track, and there are no serious problems so far.
